

SPARES FOR CONCRETE PUMPS

We produce spares and wear replacement parts suitable for commonly used concrete and shotcrete pumps. Delivery lines and accessories are made up of wear and abrasion resistant seamless pipes/forgings which are perfect for tough and demanding working conditions.

Some parts are made in high manganese castings for optimum working life and minimum breakdown. Special alloy steel parts with TC Inserts are used for pumping unit parts which have to endure very high abrasion. We specialise in pumping unit parts and delivery lines for these machines.

**DELIVERY LINE
DN 65 to DN 200**

WELD-ON COLLARS

Sponge Cleaning Balls
50 mm to 200 mm

SEAMLESS BENDS

COUPLINGS

Forged Cup Tension Couplings

WEAR PARTS FOR PUMPING UNIT

Wear Resistant ST 52 Grade Steel Pipes

Reduction Pipes
Connection Pipes
Mechanical Shut Off Valves

REPLACEMENT PARTS SUITABLE FOR PUTZMEISTER, SCHWING, CIFA, GREAVES, AQUARIUS, SANY AND OTHERS
